WEIGHT & DIABETIC

Support for overweight & diabetes

If jumping from the scratching post becomes difficult, the cat drinks excessively, is very hungry and gains or loses a lot of weight, the diagnosis of diabetes may be present. As with humans, it is then time for a diet that meets their needs: with Josera Help Weight & Diabetic the cat can maintain its ideal weight or, with moderate feeding, gently reduce it and get the diabetes under control.

The calorie- and sugar-reduced recipe is ideally suited for such a diet. Fibres support normal blood sugar levels and also contribute to satiety. The phytogetic complex contains ginger tuber, which has a digestive effect. - Ginger is a traditional ingredient for diabetes support.

Josera Help Weight & Diabetic can help your velvet paw to feel better by helping it to lose weight and maintain its ideal weight through reduced calorie intake. For cats suffering from diabetes, the recipe can also be supportive.

- Suitable for a needs-based diet
- Can support diabetes therapy thanks to reduced calorie and sugar content
- Rich in fibre: Supports normal blood sugar levels and contributes to satiety despite reduced energy content
- With the phytoegen complex: the ingredients of the ginger tuber have a digestive effect
- Stimulation of the metabolism through a high protein content
- L-carnitine stimulates fat metabolism and supports muscle maintenance

Analytical constituents:		
Protein	%	35.2
Fat content	%	9.8
Crude fibre	%	5.7
Crude ash	%	6.7
Calcium	%	1.35
Phosphorus	%	1.00
Sodium	%	0.45
Magnesium	%	0.10
Potassium	%	0.60
Taurine	mg	1,500
metabolisable energy per kg	MJ	14.5
metabolisable energy per kg	kcal	3,468
Total sugar	%	1.20
Starch	%	29.5

Additives: Nutritional additives per kg:		
Vitamin A	I.E./kg	24,000
Vitamin D3	I.E./kg	1,800
Vitamin E	mg/kg	220
Vitamin B1	mg/kg	15
Vitamin B2	mg/kg	20
Vitamin B6	mg/kg	20
Vitamin B12	mcg/kg	100

Additives: Nutritional additives per kg:		
Calcium-D-pantothenate	mg/kg	50
Niacin	mg/kg	90
Folic acid	mg/kg	5
Biotin	mcg/kg	1,000
L-carnitine	mg/kg	500
Iron (iron(II) sulphate monohydrate)	mg/kg	200
Zinc (zinc chelate of glycine, hydrate (solid))	mg/kg	160
Manganese (manganese (II) oxide)	mg/kg	18
Copper (copper(II) chelate of glycine hydrate (solid))	mg/kg	18
Iodine (calcium iodate, anhydrous)	mg/kg	1.80
Selenium (sodium selenite)	mg/kg	0.30

Technological additives:

Antioxidants: tocopherol extracts of natural origin.

Dietary feed with reduced energy content for adult cats to support diabetes mellitus.

Composition: dried poultry protein; maize; dried greaves protein; rice; cellulose; dried beet pulp (natural source of dietary fibre); poultry fat; hydrolysed animal protein; minerals; poultry liver hydrolysate; psyllium husks; oregano; ginger 0.04 %; rosemary; nettle; milk thistle; cranberry.

Ginger

The valuable ingredients of the ginger tuber have a digestive and anti-inflammatory effect. Ginger can support normal metabolism and healthy weight loss. Traditionally, it is also used to support diabetes.

Gentle weight management

The low-fat recipe with few calories and sugar, but increased protein content, supports a gentle weight loss of the cat and still provides it with all vital nutrients. With constant weight control and, if necessary, slight adjustments to the amount of feed, a gentle weight reduction is achieved when the cat loses 1-2% body mass per week.

More fibre

The high dietary fibre content can prevent begging and hunger between meals, as it provides an increased feeling of satiety. The fibre content can slow glucose uptake from the gut into the blood and help stabilise blood sugar.

Feeding recommendation:

Weight	Weight maintenance	
	Weight reduction	Weight maintenance
2-3 kg	overweight 25-35 g	normally active 35-55 g
3-4 kg	35-45 g	45-70 g
4-5 kg	45-50 g	60-80 g
5-7 kg	50-65 g	70-95 g
7-10 kg	65-80 g	85-125 g

Feeding recommendation per day. Ensure that your pet always has access to fresh drinking water. For optimal effect, only feed the diet feed. Additional feedings must be discussed with the attending veterinarian in advance. For diabetes: Low mono- and disaccharide content. Recommended feeding duration initially up to 6 months. It is recommended that a veterinarian's opinion be sought before use or before extending the period of use. Carbohydrate sources: Maize, rice, dried beet pulp.

Available in: 400 g; 2 kg
